

Probiotics

is the 21st century answer to the problems associated with the overuse of antibiotics in the 20th century!

Probiotics is the 21st century answer to the problems associated with the overuse of antibiotics in the 20th century!

Biotic means Life. Anti-biotic means Against Life. Pro-biotic means For Life (Pro Life). A compromised immune system due to pharmaceutical drugs, antibiotics, toxins in our water, air, soil, food, and a polluted environment gone unchecked means you need an internal army of pro-life (probiotic) fighters. These friendly flora assist the defense system.

Living Streams Probiotic is the only probiotic you can apply to the skin or take by mouth. This unique liquid probiotic works equally as well topically or orally.

Living Streams Probiotic is a totally new, unique friendly flora probiotic. This product is the direct result of years of research and could well be one of the most beneficial products in support of the body's homeostasis ever discovered.

Living Streams Probiotic is all natural and made from naturally occurring lactic acid flora found in many foods such as vegetables, cheese, and other dairy products.

Living Streams Probiotic contains the beneficial flora, along with a high concentration of various by-products of these friendly bacteria, such as "B" vitamins, enzymes, natural fighters against the bad bacterias (bactericins) and other yeast and fungal inhibitors and other substances necessary for homeostasis.

Living Streams Liquid Probiotics

Available in 2 or 8 oz. bottle.

Subclinical infections are one of the leading causes of poor health today. Most people think of an "infection" as something obvious, but in most cases people have infective processes taking place in their body and they have no idea it is occurring. The healthiest of people can have subclinical infective processes going on unknowingly. Due to environmental stresses, poor or depleted diet, and many other causes, bacteria, virus, mold, yeast and fungus can colonize within the intestinal track and systemic tissues such as joints, etc., and discourage the growth of your good bacteria. These agents, when allowed to remain, continuously release potent toxins into the body tissues and circulation. These toxins can do great harm, especially when allowed to linger undetected. This is occurring on a regular basis in most cases, but it is not producing overt "symptoms..." clinical symptoms, and therefore most people miss the continuing threat these infective processes cause.

Living Streams Probiotic is a natural by-product of friendly bio-organisms (probiotics) that have been specially cultured and developed to produce the natural substances the human body was meant to receive from flora in the intestinal track. However, because of processed foods, (for both humans and animals) lack of enzymes and other nutrients, poor quality intestinal flora and other health stresses, even the normal amounts of these substances that would otherwise be there are missing in most animals and people. On top of that, because the friendly bacteria are missing, growth of "bad" bacteria, fungus, yeast, virus and mold colonies can seriously harm health. Even if you think you are healthy, subclinical infective processes are at work, slowly damaging your health.

Living Streams Probiotic is a totally new, unique friendly flora liquid solution. The secret is in the "solution" the friendly flora produce, NOT in the bacteria themselves or the quantity of bacteria. This is what sets Living Streams Probiotic apart from all other probiotic products. This product is NOT a full spectrum probiotic, although it does contain the original bacterial elements which produced the Living Streams Probiotic solution, and which grow in the intestinal area. The secret

is in the strength of the solution, which is many times as powerful as any probiotic product can produce in the body naturally. Bacteria have long been known to benefit human health via their production of natural substances.

Living Streams Probiotic is a solution made from all natural probiotic... naturally occurring organisms in many foods... but it is specially formulated and processed to "super activate" their natural bio-production of beneficial substances that supports the immune system against infective agents such as mold, fungus, yeast, viral components and bacteria.

Living Streams Probiotic is a safe and natural liquid solution, the color of pale tea. It is NOT a drug or other chemistry-altering substance. It simply provides the natural substances friendly flora normally should be providing the body, but this solution is a much stronger concentration of these vital substances. Don't get confused by looking for "bacterial counts" in this product. The secret is in the products these friendly bacteria produce for us.

Living Streams Probiotic was lab tested against New Orleans flood waters... considered to be 40,000 times from safe levels for humans. Our product killed 95% of the pathogens within the first 5 minutes and 99+% within 30 minutes.

Living Streams Probiotic "helps the body to fight off diseases". Here is a partial list so far:

- Bad breath
- Plaque and cavities
- Gum disease
- Digestive problems
- Diarrhea
- Insect bites
- Burned skin
- Raspy voice and/or sore throat
- Ear aches
- Eye infections
- Acid reflux
- Septicemia ("septic blood")
- Constipation
- Listlessness
- Detoxification
- Hepatitis C

- Typhus
- Salmonella poisoning
- Blood virus infections
- H-Pylori
- Fungus
- Candida/Yeast
- Feminine problems
- Athletes Foot
- Rashes and other skin problems
- Poison ivy
- Black and other molds
- Mrsa
- Shingles
- Eczema
- Colds and flu
- Chicken pox
- Herpes
- Lyme disease
- Chronic fatigue
- Cuts and scrapes

Living Streams Probiotic is a unique unprocessed liquid, containing, acidophilus, other healthy flora and numerous naturally occurring by-products, called nutrients or food. Our probiotic carries with it all the protection the flora needs to survive in the digestive tract.

One of our main flora (Paracasei) is a healthy cleanse flora that works in the liver and digestive tract to help flush out toxins and works as an antifungal. Research indicates that the Curvatus lactic acid microbe has the ability to produce antibacterial, antifungal, antiviral, and antimold agents to inhibit these organisms from flourishing in your system.

Living Streams' primary flora, including acidophilus, is blended with other lactic acid flora for additional support. You should use our product where pathogens invade: eyes, ears, nose, mouth, skin, lungs, and stomach. Can be taken internally, externally, or dispensed through inhalant equipment safely.

Living Streams Probiotic was lab tested against New Orleans flood waters... considered to be 40,000 times from safe levels for humans. Our product killed 95% of the pathogens within the first 5 minutes and 99+% within 30 minutes.
